### PREPOSITIONS RISK: Review of prepositions of place and movement

You have to complete the sentences and write a preposition in the space. There are four prepositions to choose from. You have to decide which is the most likely and natural preposition, then you have to decide how certain you are that your answers are correct, and 'risk' points. **5** points if you don't know or are 50% sure, **10** points if you are 75% sure, or **15** points if you are *100 per cent certain* your answer is correct! But if you get the answer wrong *in any way*, the number of points you have risked on the answer will be taken away from your final score!
