## ARTICLES RISK: Review of A, AN, THE and zero article

You have to complete the sentences with the choices of **a, an, the** or **nothing** at all and write your answers in the space. Then you have to decide how certain you are that your answers are correct, and 'risk' points. **5** points if you are 50% sure, **10** points if you are 75% sure, or **15** points if you are *100 per cent certain* your answer is correct! But if you get the answer wrong *in any way*, the number of points you have risked on the answer will be taken away from your final score!
